UNDERSTANDING ELLIPSIS: CORPUS, ANNOTATION, THEORY

Jim McCloskey
Professor of Linguistics
University of California Santa Cruz

This talk has three closely interlinked goals:

(1) to provide an overview of the work of the Santa Cruz Ellipsis
    Project <http://ohlone.ucsc.edu/SCEC/> and the research resources that
    it is making available.

(2) in that context to consider the role and the potential of
    corpus and annotation work as a research methodology and its
    articulation with the work of theory construction

(3) to review some of the principal empirical findings to have emerged
    from the project to date and to consider what the theoretical
    implications of those findings might be.
